

PRE-ASSEMBLED & WIRED

SINCE 1987

InPlant Portable Shelters & Booths

InPlant's Booths, Guard Shacks, Control Rooms, Operator Cabs and Security Shelters are prefabricated in the factory, wired fully assembled. They are designed for easy shipping – all Booths under 8' by 20' ship at standard rates. Larger Booths require

Oversized 12x20' exterior building shown. All Booths under 8x20' are shipped at standard rates.

oversized shipping. The Booths are built on a welded steel channel base frame, which supports the structure, subfloor and vinyl tile flooring. Fork pockets are formed in the steel base for easy unloading and placement using a forklift.

Shelters for interior & exterior use

For interior use, our Booths can be assembled in a wide variety of Wall Panel options.

For exterior applications, we pair our 3" All-Purpose Aluminum Building System with

our Cement Board Wall Panels for maximum durability and weather resistance.

Exterior Roof Panels are 3" thick for added insulation with

steel facing for strength to support the exterior

grade corrugated roof and the perimeter gutter

system with downspouts. The windows are exterior grade and can be fixed or sliding.

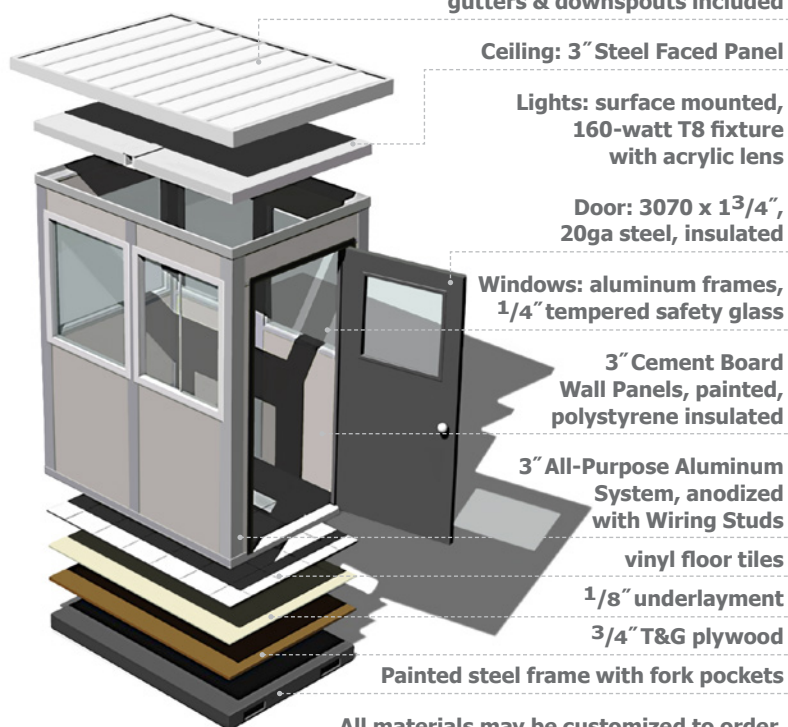

In the Booth, the outlets, lighting and HVAC are pre-wired in the electrical raceways built into the structural Wiring Studs and Roof Panel.

Security application extends protection

We offer custom modifications — including bullet- and blast-resistant construction — along with the ability to fully integrate with security cameras, access control doors, and more.
